PROCESS

Technological process

Material	Stainless steel, Duplex, Super duplex, Nickel alloy, Titanium
Size	Φ1.0 - Φ3.0m, Φ3.0m - Φ6.0m, Φ6.0m - Φ12.0m, Φ12.0m - 30Φ12.0m
Type	Vertical, Horizontal, Spherical, Sphere, Cone
Method	Manual welding, Automatic welding, Argon arc welding, Spot welding, Seam welding, Electric welding, Gas welding, Cold welding, Friction welding, Ultrasonic welding, Explosion welding, Diffusion welding, Laser welding, Electron beam welding, Plasma welding, Electrical slag welding, Electrical gas welding, Electrical induction welding, Electrical resistance welding, Electrical arc welding, Electrical electron beam welding, Electrical laser welding, Electrical plasma welding, Electrical electrical slag welding, Electrical electrical induction welding, Electrical electrical resistance welding, Electrical electrical arc welding, Electrical electrical electron beam welding, Electrical electrical laser welding, Electrical electrical plasma welding, Electrical electrical electrical slag welding, Electrical electrical electrical induction welding, Electrical electrical electrical resistance welding, Electrical electrical electrical arc welding, Electrical electrical electrical electron beam welding, Electrical electrical electrical laser welding, Electrical electrical electrical plasma welding, Electrical electrical electrical electrical slag welding, Electrical electrical electrical electrical induction welding, Electrical electrical electrical electrical resistance welding, Electrical electrical electrical electrical arc welding, Electrical electrical electrical electrical electron beam welding, Electrical electrical electrical electrical laser welding, Electrical electrical electrical electrical plasma welding, Electrical electrical electrical electrical electrical slag welding, Electrical electrical electrical electrical electrical induction welding, Electrical electrical electrical electrical electrical resistance welding, Electrical electrical electrical electrical electrical arc welding, Electrical electrical electrical electrical electrical electron beam welding, Electrical electrical electrical electrical electrical laser welding, Electrical electrical electrical electrical electrical plasma welding, Electrical electrical electrical electrical electrical electrical slag welding, Electrical electrical electrical electrical electrical electrical induction welding, Electrical electrical electrical electrical electrical electrical resistance welding, Electrical electrical electrical electrical electrical electrical arc welding, Electrical electrical electrical electrical electrical electrical electron beam welding, Electrical electrical electrical electrical electrical electrical laser welding, Electrical electrical electrical electrical electrical electrical plasma welding, Electrical electrical electrical electrical electrical electrical electrical slag welding, Electrical electrical electrical electrical electrical electrical electrical induction welding, Electrical electrical electrical electrical electrical electrical electrical resistance welding, Electrical electrical electrical electrical electrical electrical electrical arc welding, Electrical electrical electrical electrical electrical electrical electrical electron beam welding, Electrical electrical electrical electrical electrical electrical electrical laser welding, Electrical electrical electrical electrical electrical electrical electrical plasma welding, Electrical electrical electrical electrical electrical electrical electrical electrical slag welding, Electrical electrical electrical electrical electrical electrical electrical electrical induction welding, Electrical electrical electrical electrical electrical electrical electrical electrical resistance welding, Electrical electrical electrical electrical electrical electrical electrical electrical arc welding, Electrical electrical electrical electrical electrical electrical electrical electrical electron beam welding, Electrical electrical electrical electrical electrical electrical electrical electrical laser welding, Electrical electrical electrical electrical electrical electrical electrical electrical plasma welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical slag welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical induction welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical resistance welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical arc welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electron beam welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical laser welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical plasma welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical slag welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical induction welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical resistance welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical arc welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electron beam welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical laser welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical plasma welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical slag welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical induction welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical resistance welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical arc welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electron beam welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical laser welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical plasma welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical slag welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical induction welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical resistance welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical arc welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electron beam welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical laser welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical plasma welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical slag welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical induction welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical resistance welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical arc welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electron beam welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical laser welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical plasma welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical slag welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical induction welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical resistance welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical arc welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electron beam welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical laser welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical plasma welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical slag welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical induction welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical resistance welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical arc welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electron beam welding, Electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical electrical laser welding, Electrical
