

PROCESS

| Process | Description |
|-------------------------|--|
| 1. Material Preparation | Raw materials are prepared and weighed according to the recipe. |
| 2. Mixing | The prepared materials are mixed in a large industrial mixer. |
| 3. Extrusion | The mixture is extruded through a die to form a continuous strand. |
| 4. Cooling | The extruded strand is cooled in a water bath or cooling tank. |
| 5. Drying | The cooled strand is dried in a drying oven to remove moisture. |
| 6. Pelletizing | The dried material is cut into small pellets. |
| 7. Storage | The pellets are stored in a silo or bag for further use. |
