PROCESS

Technological process

Process 1 YARN	Raw Material Color Sorting Grade Blend Analysis
Process 2	Weight Dry Grading, we can mark TOP NO. With Tag.
Color Line	With use OEM servo, strictly for dyeing and sample.
Cone Line	For spinning, output cylindrical, tapered cone yarn, with large, aluminum component. For the production of tubeless and cylindrical cones.
Winder Line	Use Servo, PLC control, touch screen.
Fiber Analyzer	Use for fiber length, strength, uniformity, color, impurities, etc.
Laboratory Tests	Strength, Yarn Evenness Test, Yarn Hairiness, Yarn Count, Twist Per Inch, Shrinkage Test, Moisture Content, Yarn Appearance, Tensile Test, Elongation Test, Yarn Uniformity Test, Yarn Count Test, Yarn Twist Test, Yarn Hairiness Test, Yarn Appearance Test, Yarn Tensile Test, Yarn
