Dear Jack,

I got a feedback of our engineer that metal [arts 12000008 are almost ok but the thread's surface could and should be smoother. The goods really have a good quality but please try to improve the material's surface inside the thread.

Our engineer suggested to change the mixture of your drilling fluid.
I hope this could help. so that we can receive "not only" good parts but perfect ones in the future.

Thanks.
